DYNATECT®

DYNAMIC EQUIPMENT PROTECTION

LIFTGARD® PREMIER

Improve Safety, Appearance, and Protection from Debris

Liftgard® Premier is engineered for applications that demand superior durability, appearance, and ease of installation. The Premier includes a robust aluminum frame design, integrated zipper access, and vented corners for smooth operation. Liftgard Premier provides exceptional structural support while accommodating the expansion and compression of moving lift equipment. Liftgard Premier delivers the highest level of performance and visual appeal in the Liftgard product family.

Features and Benefits

- Quick and easy to install – pre-assembled covers are folded for shipping, then easily unfolded for assembly – no need to insert steel rods
- Internal & External aluminum frames provide rigid support structure
- Improved appearance over stitched skirts
- Improved safety for operators with full-circumference bellows skirting
- Liftgard is easily modified for special applications such as washdown
- Branded options and custom colors available

Materials and Construction

- Standard material: 18 oz. yellow PVC/Nylon, 0.021" nominal thickness, with black corners
- Custom materials available for special applications; several color options available

Additional Options

- Hook-and-loop fasteners for mounting
- Tie strips
- Maintenance straps
- Mounting plates

High Volume Requirements? *Dynatect has productivity tools that result in lower prices on orders of 10 or more, contact Dynatect for volume requirements of 10 or more.*

DYNATECT®

DYNAMIC EQUIPMENT PROTECTION

LIFTGARD® ESSENTIAL

Improve Safety, Appearance and Cleanliness on a Budget

Liftgard Essential is a cost-effective bellows cover designed to protect lift mechanisms while accommodating the expansion and compression of moving equipment. Featuring durable sewn construction, standardized design elements, and common mounting configurations, Liftgard Essential is engineered to provide dependable protection at a lower cost than alternative covers. Each cover is custom configured to fit the application while leveraging proven design features that streamline production and help reduce costs. Liftgard Essential helps improve safety, protect equipment, and enhance appearance in industrial lift applications while delivering the trusted protection expected from the Liftgard product family

Features and Benefits

- Standardized design and streamlined manufacturing help reduce costs, particularly for orders of 10 or more units
- Available in 3-sided and 4-sided rectangular profiles to fit a wide range of lift configurations
- Improves operator safety with full-circumference bellows skirting

Materials and Construction

- Standard material: 18 oz. PVC/Nylon fabric construction
- Available in all-yellow, all-black, or alternating yellow-and-black color options
- Sewn construction provides a durable and economical solution for standard industrial lift applications

Additional Options

- Maintenance straps
- Hook-and-loop fasteners for mounting
- Mounting plates
